Memorandum

To: Members of the Planning, Development, and Environmental Quality Committee
of the Tompkins County Legislature
From: Scott D. Doyle, AICP, Associate Planner
Re: **Use of Tompkins County Natural Infrastructure Capital Project Funds for Support of the Etna
Swamp – Brotherton Farm Protection Project**
Date: June 22, 2017

Requested Action

Support the use of funds from the Natural Infrastructure Capital Project Funds for the acquisition of easement on the Brotherton Farm for the purposes of protecting and improving the buffer to the Etna Swamp and Fall Creek.

Background

The *Natural Infrastructure Capital Program* is focused on protection, by acquisition, easement, restoration and/or stabilization, of: upper watershed forests and wetlands; stream corridors and floodplains; and aquifer recharge areas. The objectives are to: **1)** protect and enhance those natural systems that can help to mitigate the impacts of intensive rainfall events that are expected to continue to increase as a result of climate change; **2)** help decrease sediment loads in streams and Cayuga Lake; and **3)** protect overall water quality in streams, surficial aquifers and Cayuga Lake. Additional benefits could include improved wildlife habitat and recreational opportunities. The impact over time will be to reduce risks of flooding and protect public and private water supplies. The program may also help to fund demonstration green infrastructure projects on County properties.

The Tompkins County Legislature funded the program for 2017 and the Planning, Development and Environmental Quality Committee approved the program overview and criteria in January 2017.

The Natural Infrastructure committee of the Planning Advisory Board meets annually, or as needed to respond to time-sensitive opportunities, to review projects presented by the Planning and Sustainability Department. When projects are ready for implementation, recommendations from the committee are reviewed by the full Planning Advisory Board and the Commissioner of Planning and presented, with their recommendation, to the legislative committee responsible for oversight of the Planning and Sustainability Department. If approved by the legislative committee, project funding will proceed in compliance with county procedures for contracting for capital projects; project funds will be administered by the Planning and Sustainability Department.

Proposed Project

As noted in the attached document, \$20,000.00 in funding from the Tompkins County's Natural Infrastructure Project funds to support the acquisition of a perpetual conservation easement on the Etna Swamp – Brotherton Farm Protection Project held by the Finger Lakes Land Trust. This project enhances the formal protection of significant wetland system and Unique Natural Area which feeds Fall Creek. Such protections will assist in decreasing sediment loads to both Fall Creek and ultimately Cayuga Lake. Discussions with the Town of Dryden are pending regarding the project and will be completed prior to bringing the resolution to the full Legislature for approval.

Budget Implications

The Natural Infrastructure Capital Program is funded at \$200,000 for 2017.
